Intellect's AI-Powered Quality Management System

Elevate Quality. Automate Compliance. Accelerate Success.

Intelligent Quality Management Systems for Modern Enterprises

In today's fast-moving environments, the smallest quality issue can snowball into major disruptions—leading to delays, compliance risks, and loss of customer trust. Intellect QMS AI is an intelligent Quality Management System that empowers mid-market and enterprise organizations to elevate quality, minimize risk, and accelerate operational excellence.

Over 30 Pre-Built Applications Ready to Use

Advanced Product Quality Planning (APQP)	Aspects & Impacts	Audit Management	Batch Records	Calibration & Maintenance	Corrective & Preventive Actions (CAPA)	Change Management	Complaint Management	Cost of Quality (COQ)
Deviation Management	Device History Record (DHR)	Document Control	Engineering Chance Notice (ECN)	Employee Training	Environmental Management	Failure Mode & Effects Analytis (FMEA)	Feedback Management	Incident Management
Inspection Management	Job Hazard Analysis	Nonconformance	Production Part Approval Process (PPAP)	Proficiency Testing	Quality Inspections	Risk Management	Supplier Management	Validation & Verification

### Intellect's Adaptable QMS Platform Solves Rigidness of Legacy

Intellect has eliminated the rigidity of legacy QMS platforms by combining AI-powered intelligence with enterprise-grade security in a single, unified solution. The result is faster deployments, easier configurations, and real ROI—without compromising compliance.

Leading Organizations Choose Intellect QMS AI for Smart Analysis

Intellect QMS AI helps workers make better decisions, identify root causes, and gain deeper insights into their data with our Smart Analysis tool.

Users of Intellect QMS AI have experienced remarkable efficiency improvements ranging from 50% to 90%+.

Built-In Risk & Compliance Connectivity

Maintain audit readiness for ISO and FDA approvals to reduce risk with connected quality applications that drive compliance across your entire operation.

Hosted on AWS

Adaptable Platform

Intellect QMS AI integrates seamlessly with ERP, MES, and BI tools through real-time data sharing, enabling faster decisions, stronger cross-team collaboration, and greater visibility.

Perform audits anytime, anywhere

Empower teams on the go with mobile access for audits, CAPAs, inspections, and approvals—anytime, anywhere. With offline capabilities, real-time dashboards via Data IQ, AI-driven insights, mobile search, and instant photo or file uploads, Intellect ensures uninterrupted, efficient workflows in the field or on the factory floor.

ISO Compliance

As an ISO-certified company, Intellect understands the rigorous demands of international standards. Intellect's quality management solution is purpose-built to help organizations implement, maintain, and continuously improve their ISO 9001, ISO 13485, and other ISO-compliant processes. Also, the platform is fully validated out of the box, enabling regulated organizations—specializing in life sciences and medical devices—to deploy with confidence and meet compliance requirements from day one.

Real-Time Mobile Quality Control

Intellect's new mobile application allows users to make updates seamlessly through Native iOS and Android phones and tablets

Unlock the Future of Quality Management

Intellect QMS AI isn't just a system—it's your partner in digital transformation. With built-in intelligence, unmatched flexibility, and proven results, Intellect helps you stay ahead of change, reduce risk, and lead with quality.
