

Intellect QMS AI Platform for Life Sciences

Ensure Compliance. Reduce Risk. Accelerate Innovation.

AI-Enabled Quality Management for Life Sciences

In the fast-moving world of life sciences—spanning pharmaceuticals, biotechnology, and medical devices—compliance, quality, and speed-to-market are non-negotiable. Evolving global regulations and rising innovation demands make managing quality more complex than ever.

Intellect QMS AI is an advanced, AI-powered life sciences QMS platform built to simplify compliance, automate quality processes, and accelerate innovation. Whether you're a pharmaceutical manufacturer, biotech, or medical device company, Intellect helps you reduce risk, improve operational performance, and stay inspection ready.

Intelligent Solutions for Pharmaceutical, Biotech, and Medical Device Quality Simplified

Intellect QMS AI provides an adaptable quality management system for life sciences companies that integrate seamlessly with your existing processes and adapt to your evolving business requirements, empowering you to maintain compliance, drive efficiency, and scale with confidence. Our AI-driven platform enhances traceability, automates compliance workflows, and helps ensure adherence to FDA and global regulatory standards.

By eliminating manual processes and surfacing intelligent insights, Intellect enables your quality teams to focus on driving innovation—not chasing documents.

Modern Document Control & Validation

Digitized Standard Operating Procedures (SOPs), Work Instructions & Quality Events. Paper-based processes and legacy systems are inefficient and error-prone. Intellect QMS AI digitizes the control and management of Standard Operating Procedures (SOPs), training records, work instructions, and quality events.

Built for compliance with FDA 21 CFR Part 11, ISO 13485, and GxP, Intellect supports both out-of-the-box and custom validation services—simplifying validation for new and ongoing processes.

Automated Risk & Compliance Management

Meet FDA, GMP, and ISO Requirements with Confidence. Stay ahead of regulatory requirements using an FDA-compliant QMS that automates adherence to standards including ISO 13485, EU MDR, and GMP. Intellect leverages AI for rapid root cause analysis and intelligent CAPA recommendations, so your team can close quality gaps faster.

The platform includes built-in quality event tracking, audit trails, and automated inspection readiness—perfect for maintaining audit-proof records across global operations.

Manage Product and Process Changes with Control

Whether launching a new formulation, modifying a process, or scaling manufacturing, every change introduces regulatory risk. Intellect QMS AI helps mitigate that risk through AI-powered Engineering Change Notice (ECN) that delivers full visibility, justification tracking, and streamlined approval—ensuring compliance while supporting faster innovation.

Cloud-Based QMS Data Anywhere & Mobile-Ready Quality System

Intellect's cloud-native, mobile-friendly platform empowers quality teams to conduct inspections, audits, and approvals from any location—on any device. Secure offline functionality supports compliance in controlled environments like labs and cleanrooms, ensuring your medical device quality system remains operational even without connectivity.

Built for Life Sciences: Secure, Scalable, Intelligent

Intellect is hosted on AWS, providing enterprise-grade security that complies with HIPAA, FDA, and 21 CFR Part 11. Advanced encryption, secure user roles, and full audit trails ensure data integrity and compliance.

Our highly configurable platform adapts to your unique business processes. No-code tools let you customize workflows, dashboards, and reports—while embedded AI continuously improve quality and compliance performance.

Real-World Results for Life Sciences Companies How Intellect QMS AI Delivers Value

Faster Regulatory Approvals

Streamlined documentation and audit-ready records reduce time-to-market.

Proactive Risk Mitigation

AI identifies compliance risks before they escalate.

Automated Training Compliance

Ensures certifications are always current and audit ready.

Seamless Ecosystem Integration

Connects with LIMS, MES, ERP, and BI tools like Tableau and Power BI.

Integrate with the Tools You Already Use

Intellect's AI-powered Quality Management Systems platform seamlessly integrates with essential operational systems, including LIMS, ISM, MES, LMS, and ERP platforms. Additionally, it offers robust compatibility with leading business intelligence (BI) tools such as Tableau and Power BI, enabling comprehensive data analysis and reporting.

Flexible APIs and pre-built connectors support implementation and integration with your existing systems. Implementation is fast and seamless—no heavy IT lift required.

Life Sciences Leaders Choose Intellect QMS AI

Life Sciences organizations require quality management solutions that prioritize patient safety, product integrity, and regulatory compliance. Intellect QMS AI delivers real value by enhancing operational efficiency, streamlining compliance processes, and supporting continuous improvement across all stages of the product lifecycle.

Reduce Time to Compliance

Streamline documentation and validation workflows.

Enhance Productivity

Automate manual tasks and boost quality team efficiency.

Scale Across Global Teams

Deploy a unified quality platform across sites and regions.

Drive Innovation Safely

Empower faster change without regulatory compromise.
